THE CHRONICLES OF THE ORANGE AND BLACK

Editor—Charlotte Knight

Magrath High—"Thanks very much R. H. B. for inviting us over. We certainly had a glorious time!"
Raymond High—"Your welcome Magrath! Glad you enjoyed it. Come again!"

So said Magrath High to Raymond High eleven o'clock last Friday night after a whole afternoon of enjoyable recreation. About ten cars carrying Magrath students arrived in Raymond Friday afternoon for the High School Literary program, to which they were invited. They arrived on time in spite of the rain and mud. A splendid program followed their arrival which was sponsored by the Grade 12 students. It consisted of the following numbers.

- 1 A reading by LeNore Scoville.
- 2 A piano selection by Marie Redd.
- 3 A musical number by three members of the staff: Mr. Low being the pianist, Mr. Blackmore singing, and Mr. Redd playing the cornet.
- 4 The next number was a comedy act, "Lochinvar" with the following cast:

Alice Litchfield—Lochinvar
LeNore Scoville—The fair Ellen
Wayne Wooley—The brides father
Arnold Aldridge—The brides mother
Wilford VanOrman—The bridegroom
Besides these mentioned, there were guests, bridesmaids, etc.
The above numbers were very successful and received a great deal of applause.

At the close of the program, Marie Redd was presented with a large box of candy for being the most popular lady in the R. H. B. She received over 4000 votes. Congratulations Marie!
The Popular Lady Contest ended at 8 o'clock Friday with Marie Redd, 1st 4000 votes and Bessie Witbeck, 2nd with 3500 votes.

After the Literary Program a matinee dance was held in the gym, with the Canadian Kids in attendance. Following the dance, Magrath students had an enjoyable time in going thru the Sugar Factory; and to complete the day, they all stayed over for the picture show "The Trial of Mary Dugan."

Thus passed a day of successful entertainment, so Magrath said!

Hear Ye! Hear Ye! The school court personnel has been chosen, the judge will be returning soon, and everyone is ready for the 1st court session. The only thing lacking is the fact that we haven't yet found anyone for a defendant. Sheriff Galbraith and his detectives will have to get busy. The judge must just be aching to sentence someone to five or six hours work at raking leaves off the grounds, so you'd better stay on the "good side of him."

1st CASE

Judge Bascom to defendant—"Well who brought you here?"

Defendant—"Bruce and Kenneth"
Judge Bascom—"Druik, I suppose?"
Defendant—"Yes, both of them."

2nd CASE

Judge Bascom—"Why you impudent what are you guilty of?"

Defendant—"I'm not guilty!"

Judge Bascom—"Why you impudent young egg! Three hours work for contempt of court!"

Defendant—"But your honor"

Judge Bascom—"Shut up! make that six hours."

The chronicle staff has been chosen which consists of the following people
Charlotte Knight—Editor in chief.
Alice Litchfield—Deputy Editor from grade 12.

Marie Redd—Deputy Editor from grade 11.

Wyora Scoville—Deputy Editor from grade 10.

Ruth Evans—Deputy Editor from grade 9.

Donald Nilson and Elaine Park—Cartoonists.

Beth Walker—Sports Editor.

HERO OF MANY POLAR FLIGHTS BRAVES FROZEN ISOLATION OF SOUTH POLAR DESOLATION

Captain Donald Overton, Commander of the Halden Antarctic Expedition, Leaves for Conquest of Ice-Bound Wastes at Bottom of World; Lieut. James Farham Acts as Navigator

ALL TALKING

WILLIAM HOLDEN, MILLIONAIRE BACKER OF EXPEDITION AND INVENTOR OF HOLDEN THREE-MOTOR PLANE USED IN FLIGHT, FITS SAME WITH WIRELESS

"Conquest" Records whirlwind Flight To South Pole.

ALL TALKING

Intent upon picturing one of the most startling of current daredevil exploits—South Pole exploration—Warner Bros. concentrated a copious share of their energy upon making the aviation special, "Conquest," which comes to the Capitol Theatre tonight and Saturday.

"Conquest" is a romantic modern story which has the aerial exploration of the wastes surrounding the South Pole as its background. Its production at the time when two separate air explorations of this area are actually under way gives "Conquest" a timely note that promises a really tremendous film production.

Warner Bros. have assembled a remarkable cast for "Conquest"—Monte Blue starring, H. B. Warner featured, Lois Wilson playing the leading feminine role and Edmund Broese and Tully Marshall appearing prominently. Blue and Warner are cast as aviators who make two daring attempts to reach the South Pole—their love for the same girl injecting bitter personal conflict.

Albatross, the largest monoplane in United States, and the ship which twice attempted to set the endurance marks, is used for the air scenes. The ship was fitted for her part in the film under the supervision of Lieutenant James E. Dyer, U. S. N. who has been retained as technical adviser by Warner Bros.

The brilliant special production "Conquest" is based on "The Candle in the Wind" by Mary Inlay Taylor. Eve Unsell did the adaptation and C. Graham Baker in the scenario. R. Del Ruth directed.

ALL TALKING

Local Happenings

H. C. McRae of the Mid-West Paper Sales, Calgary, was caller at the Recorder Office Thursday.

The Broadway Store's dry goods stock has been moved to the old stand of Bennett and Co. and the store's business is being conducted from there after five years in the location next King Motors.

The freight car that was pushed over the end of the beet dump last week is a sorry looking affair. Both pairs of trucks are broken off, the 12"x12" timbers that supported the rails are smashed into splinters and the steel body of the car is all twisted and bent. Luckily no one was injured.

Wm. Mertz came nearly losing a wheat bin and 600 bushels of wheat in a fire last week which started in a straw stack way out in the centre of the field. The fire was noticed by someone on the train when it came through at 4 p.m. and the alarm was phoned from the station. G. Pearson made a record run with the fire truck and arrived just as the fire had started on the corner of the bin. Neighbors had been fighting with a bucket brigade long before the engine arrived, but the fire had scorched the entire side of the building and was just starting a good blaze on one corner when the fire hose was turned on it, and thanks to a stream of water near the danger was soon over. Raymond citizens should be proud of the efficiency of its fire engine and the willingness of its brigade to answer all calls.

News Notes

Mr. and Mrs. Arlo Palmer were in Lethbridge on Monday.

Ros R. May of Magrath was in Raymond Tuesday, this week.

Miss Alice Stead of Wolford spent Saturday in Raymond with friends.

Constable Ellis, A.P.P., of Magrath was in Raymond on Tuesday on official business.

The Canadian Kids are giving a dance in the Opera House Saturday night.

Good houses every night greeted the showing of "The Trial of Mary Dugan," and everyone seemed pleased with the production.

Elders Brandley and Spackman of the Stirling Ward were at the Raymond 1st ward on Sunday evening. Their addresses were timely and much appreciated.

This was Raymond First Ward's week at the Temple. Quite a crowd went up on Thursday. The roads are good most of the way.

Born to Mr. and Mrs. Ezra Christensen at their home, Thursday, Oct. 18, a baby girl. Mother and babe are doing well.

Mrs. Vance was in Cardston this week visiting friends and relatives and attending the sessions at the Temple.

The weather continues warm and bright and beet growers are putting forth every effort to get the beets out of the ground before a snow storm covers the beets.

Radio business is good and we have agents for nearly every kind of a receiver on the market. It's a matter of take your choice, the choosing is good.

Mr. and Mrs. Carlyle Litchfield and Mrs. Minnie Litchfield attended the Temple session at Cardston on Wednesday evening and Thursday morning.

C. W. Lamb, J. W. Evans, J. W. Allred, O. J. Rolison and Junius Anderson left on Tuesday night for Calgary, in order to be present at the continuation of the J. J. Dierich trial, concerning the Monarch Bond Syndicate.

Drilling by the Mennonites on the Buck ranch is proceeding nicely. They are down about 200 ft. now and hope to strike gas about 700 or 800 feet. The Miami colony have plenty of gas for heat, light, and cooking, and if the Buck ranch colony strike a flow, it is likely some farmers in that district will have wells sunk to try and get a "gasier."

A dinner for all Ex-service men is being held at the Club Cafe on Nov. 11th at 6 p.m. Every returned man should be there as it is the intention of the meeting to decide on a memorial tablet of bronze to be put into the wall of the new Town Hall. Dr. G.W. Leach is chairman and D. L. Gilbert is Secretary of the Committee. Remembrance the date Nov. 11, Club Cafe, 6 p.m.

The M. I. A. Officers of the Second Ward held their Officers Social at the home of Mrs. M. T. King, Pres. of the Y. L. M. I. A. on Friday night last, October 18th. About 86 were present and after a short meeting the evening was spent in games entertainment and refreshments.

The spirit of the party augurs well for the M. I. A. winters work.

The Stake Sunday School Board sponsored a very successful party at the Opera House Wed. evening when they entertained the Ward Officers. 175 were present, representing every ward and branch in the Stake. A play program was rendered consisting of short talks and musical numbers. Hot chocolate and doughnuts were served as refreshments and games and dancing occupied the evening. Everyone pronounced it a decided success.

Welling News

(From our own correspondent)
(Too late for last week)

The thrashing is now nearly over, and everyone is busy in the beets. Some of the farmers are still hauling grain because of insufficient bin room at the elevators when they were thrashing. The beet yield this year is very good, considering that many of the beets were never irrigated.

Lewis Middleton, Pool Elevator man returned from Medicine Hat on Wednesday night last with his bride. They are occupying the Pool House.

Mrs. Henry Piegras and baby have been guests of Mr. and Mrs. Clarence Bowden for several days. Mrs. C. Bowden spent Monday at the home of her mother, Mrs. Terry Dugan, and everyone seemed pleased with the production.

Grant Hays, of Barnwell, accompanied by Miss Pearl McMullen of Raymond, were visitors here Sunday afternoon.

Mrs. James Thompson has returned from Cardston where she was operated on for appendicitis. She is feeling fine now.

Edward Gunning met with an accident Saturday on the road between Welling and Lethbridge. The car turned over once and a half. The top and fenders were badly smashed, but no other damage was done, and no one was hurt.

Many from here attended the Business Girls Dance in Raymond on Saturday night.

Mrs. Jenny Schumers is spending a few days with her parents, Mr. and Mrs. Shields of Raymond.

Mr. and Mrs. Amasa Bullock were here on Monday, and later in the day went to Lethbridge, being accompanied by Miss Gennet Bullock.

They have completed the bricklaying and are putting the rafters on the new church house.

ADDITIONS MADE TO TECHNICAL COURSES

Several additions have been made to the list of evening courses offered by the Institute of Technology and Art this year. One of the most important is a course in applied mechanics, under the direction of W.H. Broughton, which is expected to be of great assistance to mechanical workers in the city.

To keep in step with the changes made this year in the Boilers Act, the institute is offering a special welding course for steam engineers to help them meet the requirements for a knowledge of welding as laid down in the revised plan of the act.

As a result of a request made by several sign writers in the city, the institute officials are considering the addition of an advanced course in sign writing, providing there is a sufficiently large number of persons interested.

Continuation of the apprenticeship school system, whereby apprentices in various trades may receive special courses at the school will be conducted this year.

Aviation Course

In co-operation with the Calgary Aero Club, the school will offer a ground course in aviation. The institute has some splendid equipment for this course which has been immensely popular during the last two years. A complete airplane, as well as several motors and navigation instruments, are included in the equipment at the disposal of this class.

At present the following courses are organized: Steam engineering, electrical engineering, automotive electricity, automobile engineering, engineering mathematics, drafting for carpenters, sheet metal workers, dressmakers, architects, and the mechanical trades, machine shop practice, armature winding and electrical shop work, telegraphy, free-hand drawing, art, show cards and posters, welding, radio, applied mechanics and motor mechanics for auto owners.—Calgary Herald.

E. P. Tanner of Magrath was a Raymond visitor Tuesday night.

Halloween is not far away, and a number of parties with a dance or two will occupy the evening.

MACDONALD AT OTTAWA TELLS OF GOVT PLAN

British Dominions Each to Have Individual Voice in Five-Power Parley

PRIME MINISTER GUEST OF GOVERNOR GENERAL

Quiet Welcome Given Labor Chief on Arrival at Capital

Ottawa, Oct. 17—Canada will be represented at the five-power conference next January by her own delegates, as will the other entities which compose the British Commonwealth of nations.

No arrangements which will be binding on Canada will be entered into without the knowledge and consent of this Dominion. Final arrangements with respect to the disarmament problem depend entirely on the London conference, which the United States, Japan, France and Italy have signified their intention of attending.

To newsmen who gathered around him at Government House this morning, Prime Minister Ramsay MacDonald, who arrived in Ottawa shortly after 9 o'clock, gave the above information. When the correspondents arrived at Government House, the British Labor premier, with his daughter, Lord and Lady Willingdon, Prime Minister MacKenzie King and other prominent persons were facing a battery of still and motion picture cameras.

Mr. MacDonald looked happy and smiling. When he entered Government House he conferred to feeling much more at home in the Ottawa weather. He came from the north of Scotland, he said; where there was often a "bite in the wind."

To "Create Atmosphere"

The Labor leader reiterated the statement that the purpose of his visit was not to come to agreements but rather to create an atmosphere which would be favorable to further conferences of naval disarmament. The question embraced much more than the attitude of two powers. What the Labor Government of Great Britain wanted was a world agreement on disarmament which would result in world pacification.

He was asked if he would discuss with Prime Minister Mackenzie King the demilitarization of Halifax. His attention was drawn to the fact that dispatches from the United States had intimated that these would be one of their subjects for discussion.

"I would suggest that you take those dispatches with a large grain of salt," said Mr. MacDonald. He did not know just what he and Mr. Mackenzie King would discuss. They would probably talk over a number of things. That was as near as the Labor premier would go to indicating the nature of his conference with the Prime Minister of Canada. He hoped that as the result of Mr. Thomas' visit to Canada, the government of Great Britain would give its "best business sense" to solving the economic problems which confronted the nation.

Mr. MacDonald expressed his thanks to the press for the help which it had given him during his visit to the United States and Canada.—Calgary Herald.

DEATH SUMMONS RAYMOND MAN

J. S. Linkous 66 years, one of the earliest settlers in Raymond, passed away recently in Portland, Oregon, where two of his sons reside. Mr. Linkous had gone to the coast city in search of health but failed to improve. He had been a long and faithful employee of the sugar company and electric light company and will be mourned by a large circle of friends. He is survived by his widow and five sons and a daughter. A brother-in-law, Wilford Shields, resides at Lethbridge and left for Portland on the receipt of the news. Deceased was born in Virginia, moved west to Utah and from Utah to Canada being one of the founders of the town of Raymond.

Pres. H. B. Allen returned on Monday's train after attending Quarterly Conference in Salt Lake City.

Million Dollar Sugar Yield in 1929

BETTER FIELDS ARE YIELDING HARVEST WHICH EXCEEDS ALL EXPECTATIONS

BEETS RUNNING 13 PER CENT. IN SUGAR CONTENT—STORAGE AT FACTORY PILED HIGH AND CARS STILL ROLLING IN. BIGGER TONNAGE NEXT YEAR URGED.

Canadian Sugar Company's officials are enthusiastic and gladly pleased with the results of this year's beet crop, harvested thus far.

The outlook for tonnage promises to exceed the estimate of the officials of several thousands of tons. The gross tonnage was placed at 60,000 tons, but now the crop conditions show better than was first anticipated so that the estimate has now been raised to 55,000 tons.

Not in the history of Alberta has there been such a huge tonnage of sugar beets stored as there is at the present time, piled high in the sheds of the Raymond sugar factory. Again we quote figures—over 25,000 tons of beets are in the sheds and on the cars. Nearly 30 carloads of beets are on the track ready to be unloaded into the bins 20 feet below the rails, on the high line.

Not only visitors who take in the sights at the plant, but employees of the company also are frequently heard to remark "I never saw so many beets in all my life."

When asked regarding storage facilities to take care of the train loads, also the local deliveries made by trucks and wagons, the field superintendent jovially replied, "The sky is the limit. Tell the farmers not to stop digging; we will take care of the beets after they get here."

The steam crane which operates on the railway lines is being brought into use, other than what it was installed for, and is scooping up the beets from the ground in the new storage places and lifting them over into the chutes.

The sugar content is running very high and indications point to the high average percentage of sugar content on record. Last year the percentage reached 17.33 but this year it will exceed 18 per cent, which, indeed, speaks well for Alberta soil and climate.

Over \$1,000,000 worth of sugar will be manufactured from Alberta sugar beets this year—another record for southern Alberta. The factory will operate this fall up to December 15, and perhaps later.

Notwithstanding the success of his year's crop, the field officials are asking all beet growers to make use of fall irrigation that is now available in the ditches in order that the crop of 1930 will even exceed this year for tonnage.

The Raymond Mercantile sold a new International Truck to J. McEwen this week. "Jack" has the North Star Oil Agency.

WELLING NEWS

The beet digging is in full swing now that thrashing is finished. Many cars of beets have been shipped from both the Anderson and Welling dumps. They have both been forced to pile beets on the ground on account of the shortage of cars. The farmers are very busy, many of them are going to feed cattle and sheep this winter. They are building corrals and fencing straw stacks.

Mr. and Mrs. Geo. E. Gunning returned to their home in Spokane on Thursday.

Hyrum Ririe left for his home in Utah on Friday.

The Church Committee held a meeting at Arthur Wilde's home last Thursday evening. Those present were Messrs Arthur Wilde, Floyd Wilde, Eldred Foote, Sheridan Schumers, W. W. Peterson and David Bullock.

They have commenced to lay the shingles on the roof of the new church. Miss Ethel Peterson spent the week end with her parents Mr. and Mrs. D. Pearson. She returned Sunday afternoon to Picture Butte where she is teaching school.

Malvin King and Emmet West were the speakers here Sunday afternoon.

CIVIC ELECTIONS

Civic elections will soon be upon us. Are we studying the needs of our city and our schools? Are we satisfied with the progress that we are making as a community? If not, now is the time to think about these things and cast about for material to fill the vacancies.

There are several matters that need attention very soon. We have no reserve water supply. The pipes are full, this true, but when the pumps stop, the pressure stops. We need a god big storage tank, and we are pleased to say the Council has discussed this matter and has plans, costs and specifications on hand. Just when they expect to act on the matter we are not prepared to say.

Another civic problem that must be solved before long is a sewage system and disposal plant. There is nothing to be gained by dodging the question. We admit that it is a big question, but in the progress of our town the present unsanitary system of private sewers and cesspools will give us a black eye as long as it continues. We are not finding fault, we do not say that the coming year should see the project undertaken. We do say that the question demands a solution, and some preparatory work such as surveys, levels, approximate costs, etc., could well be undertaken any time now.

The new Town Hall is now a certainty. Thanks to the present administration there will now be a place erected where the Fire Equipment and the Town Office can be located and a building that will be a distinct credit to the town.

We have nothing but praise for the present administration. We think they have accomplished some very fine work in civic matters and are worthy of the gratitude of the people through out the town.

We must keep alive and push our town and its advantages to the fore, in order to draw population. A live wide-awake city Council is the first step.

If you don't like the present office-holders think well before petty jealousies and personal grievances cause you to vote against that which is for the betterment and advancement of Raymond.

MISS MACDONALD TELLS OF WORK AMONG WOMEN

Toronto, Oct. 17.—Autumn and spring met at the luncheon given by the Women's Canadian Club for Miss Ishbel MacDonald, Wednesday; love-lies of all decorations, great branches of flaming maples, freshly plucked, ran the length of the head table, seating twenty-four people; interspersed were huge low baskets of ferns; spring was represented by happy youth in the person of the guest of honor.

Never, surely, were women so punctual; seven hundred and fifty were seated at 12:30 and when Miss MacDonald and the executive of the club arrived the chairs, as they were pushed back, seemed like the low rumble of thunder. The demand for tickets was so great that hundreds were turned away.

Happy Description

The president, Mrs. Roy F. Greenway, was happy in her description of what Miss MacDonald had accomplished through her simplicity and good fellowship; she made reference to Margaret Ethel MacDonald, her mother, who in 1897 came to Canada as a bride—"a slip of a girl," the daughter of Lord Kelvin, and whose devotion and love are enshrined in her husband's "life" on his fellow worker and wife.

Miss MacDonald, dressed in a dahlia colored frock, with wide brimmed grey hat shading her face, spoke entirely on what had been accomplished in England in the matter of child welfare. She dwelt particularly on Bermondsey, at one time "the black spot" of London, which now is "almost healthy" simply through the work of an enlightened borough council. North Kensington was the pioneer in the work of child welfare. "It is dreadful to think that it was only because of death—the wastage of war—that help came to children so desperately in need of aid," the speaker went on, "and it was a handful of women giving voluntary work that first awoke the powers of the land."

Natural Sunlight

"We believe in artificial sunlight

but we want natural sunlight first for our children, and so we send mothers and their little ones to the roofs, everywhere in our huge cities.

"It has been thought that nothing could be done to save the mother—there has been no change in the maternal mortality rate for thirty years, but we challenge this; Bermondsey alone has demonstrated that this rate can be brought down.

"I need not come to you in Canada to tell you these things; I would like so much to stay and ask you question after question. You are all so alert, so progressive; you could help us, I know.

Something Big Done

"There is a very healthy dissatisfaction manifest everywhere over the way in which children have been 'dragged up.' It is time for women of different parts of the world to meet and analyze this dissatisfaction; at any rate we have done something big made a step to better health for the nation and for the world."

Mrs. Rhys Fairbairn, in moving the vote of thanks, spoke of the "undying aspiring spirit" of the mother which had arisen to fresh expression in the daughter; Mrs. Spalding, the secretary, seconded the motion as coming from the great assembly.

Gordon Brewerton, Cardston was Raymond visitor on Thursday this week.

The roof on J. Meheew's Garage is taking shape rapidly now and the building will soon be closed in.

Mrs. Arlo Palmer was in Cardston Wednesday and Thursday, in attendance at the Temple sessions and visiting with relatives.

Irving Hall has been busy this week giving the warehouse a new coat of paint. Yes! It looks decidedly better.

The weather is glorious. Clear warm days, bright sunny nights, at Wednesday night not even any frost. Where could you beat it.

Howard Rasmussen is leaving on Nov. 2nd to attend the Missionary School in Salt Lake, and on Nov. 13th will leave for the North-Central States Mission.

A Halloween Ball will be given by the Mutuals of the two Raymond Wards, Thursday, Oct. 31, at the Opera House. A good time is promised all who attend.

A trainload of 21 cars of beets came from the east to the Factory Sunday. The storage bins at the Factory are full and running over and at the beets continue to come in.

George Rasmussen is having a large and commodious machine built on his ranch, T. K. Roberts are now have the job. We congratulate Geo. on his economy. More sheds of his kind would be a sign of real progress.

The Vitaphone All Talking picture "Conquest" which is showing at the Capitol to-night and Saturday will be shown at reduced prices which adults 50c children 25c. Don't miss this startling production.

Matinee Prices are adults 40c—und 16 10c.

CHICKEN AND FISH

Few people ever think that there is similarity between chickens and fish. The similarity is present, none the less. The similarity is that the composition of fish protein resembles that of chicken muscle, a fact which is pointed out by Dr. Donald K. Tressler, of the famous Mellon Institute of Research, as especially important from the dietary standpoint in view of the recognized high nutritive value of chicken meat. This protein content, moreover, is the chief food constituent of fish and in it, in ample proportions, are all the essential amino-acids, "the wonderful compounds of which our muscles and many of our other tissues are constructed." These facts explain, in part, the increasing emphasis which scientists and dietitians are putting on the food value of fish, but it is only explanation in part.

Not only are sea fish rich in a protein which contains tissue-building compounds that are lacking in varying degrees in some other food but fish are easily digested, they contain much higher amounts of fat soluble vitamins than are to be found in meats, they include some inorganic elements of nutritive value that are missing in many foods, and the presence in them of such substances as iodine makes them preventives of goitre and other diseases. These are among the reasons which of late years have led doctors and other health experts more and more to advise the regular and

DEAN LAMB — RAYMOND

J. RAY KNIGHT IN NEW YORK

O. Raymond Knight, artist, cowboy, and father of the Stampede, left last week for New York City where he will officiate as judge at Madison Square Gardens Stampede.

Mr. Knight has had four invitations to attend the World Stampede in this capacity, but this is the first year he has been able to arrange things to get away. We have no doubt that the part of the judging assigned to Ray will be in good hands, and Raymond people are proud of the honor that thus comes to her by one of her citizens being chosen for work of this sort at such an event.

A grass fire, started by the children came nearly destroying the home of J. Meheew Thursday. The quick response of the fire brigade and the fact that part of the house was brick was all that saved serious losses.

HEALTH SERVICE of the CANADIAN MEDICAL ASSOCIATION

HOW LONG WILL WE LIVE?

Statisticians are able to prove to us that on the average a child born to day will likely live to 55 years of age instead of to 40 years, which was the case in the middle of the past century. This has been brought about chiefly by better care of infants, a tremendous reduction in the diarrhoeas of children which used to take such a heavy toll of infant life, pure water, safe milk and improved sanitary conditions.

There has not been a corresponding increase in the expectation of life among adults. The expectation of life at 50 years of age is not appreciably greater today than it was during the past century. One interesting point that we learn is that persons who live long come in general, of long-lived families. This does not mean that a member of a long-lived family is more likely to recover from an attack of an acute disease, but rather that if he or she does escape from an attack of an acute disease, such as those which destroy life in infancy and early adult years, such a person will be more likely to live to advanced years.

Many people have the idea that health work's sole aim is to prolong life. This is only partially true, because the ideal sought is rather health or years than more years. Because health and happiness are so closely linked together, it may be fairly said that the objective of health work is not to prolong life but to make people happier while they live.

We do not know why some families have what we might call greater vitality and so live longer than the average. We do not know why old Parr lived to 152 years. It may be, of course, that many years have been added to his life in the re-telling of his story. We do know, however, that to the adult who desires to increase his expectation of years of health, we can say moderation in all things is essential, and, above all, in food. An interest in life must be maintained whether it is in work or in play, such as a hobby. Worry must be cast out as it is the thing which wears out the machine.

Questions, concerning Health, addressed to the Canadian Medical Association, 181 College Street, Toronto, will be answered personally by letter.

NOTES FROM THE A. C.

The R. S. A. starts next Tuesday, October 23. A fairly large enrollment is assured but as yet not as many as this southern part of the province could produce.

Principal O. S. Longman is a present attending a special Co-operative School fair meeting.

Wesley Smith is also attending a meeting at Edmonton and Mr. Asplund will be there next week.

The R.S.A. Staff will be as follows: O. S. Longman B. S. A. principal and Instructor in Co-operative marketing and farm management.

C. O. Asplund B. S. A. Farm manager and Instructor in Animal Husbandry.

W. Smith B.Sc. Instructor in Field Husbandry.

D. L. Gilbert B. S. A. Instructor in English, Mathematics and Horticulture.

K. Walker B. S. A. Instructor in Science.

Mr. Atchinson, B.S.A., Instructor in Farm Mechanics.

W. Burnette Instructor in Carpentry.

J. Redig B. H. Ec. Instructress in Home Economics.

E. Peterson Instructress in Sewing.

Miss Hullet R. N. Instructress in Nursing.

M. McCubbin Stenographer.

Truck owners and drivers should bear in mind the fact that the Freight Vehicles Act requires every truck doing custom work shall have a Freight license. These licenses only cost \$2.00, and the minimum fine for infraction is \$10.00 so owners will be well advised to see that they are in possession of a license. Send your application to Dept. of Public Works, Edmonton, A. C. F. T. T. T.

DIVERSIFIED FARMING

A recent news item records the fact that "seven hundred and fifty thousand cows working in high gear for one whole day would have been necessary to produce the quantity of milk used in making up a single train shipment of evaporated milk from Aylmer, Ontario, to the Canadian West." In order that you may get the full idea of this shipment, it is stated that it was the largest of its kind ever to leave any point in Canada. It filled a train of twenty cars and consisted of 11,880 cases containing 700,000 cans, weighing 353 tons and "was destined to grace the tables of western farm houses during the harvest season." This news item read by people in the east and abroad, must have seemed like another "taking coals to Newcastle" story, yet it is undoubtedly true that Western Canada, the granary of the Empire, and the greatest agricultural area on the North American continent, is one of the best customers for canned milk to be found anywhere. Big wheat farmers are not interested in dairy farming, not even to the extent of keeping enough cows to supply home needs. If they have cattle at all they are of the beef type rather than dairy, and it is only in case of dire need that they will bother to milk a range cow.

All of which simply means that the Canadian West has not yet emerged from the first important stage of agriculture. Intensified mixed farming is something that will not be general in this country for a good many years to come and until it does become general there will be a lack of dairy cows and a shortage of whole milk for the feeding of the native population, to say nothing of manufacturing dairy products and shipping them abroad. We have proven that in Alberta we can make first class butter and cheese. We have taken high place with these in competitions and we have created a demand for our dairy products on the British market. But all this has been little more than a gesture so far. Other branches of agriculture at the moment appeal more to our farmers and they turn to them. One of these days from force of necessity they will turn to dairying and butter and cheese making in real earnest. When they do they will make a great world reputation for their province in these lines. — Alberta Farmer.

Texas to Bat Balls to Shibe Park

Dallas, Texas, Oct. 18.—Because Athletics won the world's series, Forest F. Cole of Dallas must knock flies all the way to Shibe Park, Philadelphia. Ernest Luttrell, his betting opponent, will accompany him, furnishing a fungo bat and balls. They started on Tuesday morning, and hope to be in Philadelphia by Feb. 1.

The Business of Agriculture

FARMING IS MORE THAN AN OCCUPATION; IT IS HIGHLY COMMERCIALIZED BUSINESS WHICH REQUIRES CAREFUL PLANNING AND THOUGHTFUL EXECUTION. BOUNTIFUL PRODUCTION IS NECESSARY BUT MUCH EFFORT IS WASTED UNLESS THE BUSINESS OF DISPOSING OF THE YEAR'S OUTPUT IS PROPERLY MANAGED. IN CONDUCTING THE BUSINESS OF THE FARM THE CANADIAN BANK OF COMMERCE CAN PLAY A PROMINENT AND USEFUL PART. CONSULT THE MANAGER AND LEARN HOW TRUE CO-OPERATION BETWEEN BANKING AND AGRICULTURE BUILDS A MORE PROSPEROUS COMMUNITY.

**THE CANADIAN BANK
OF COMMERCE**

(THE STANDARD BANK OF CANADA)

Here and There

(400)
The Canadian Chambers of Commerce who have been making a tour of western Canada, has reiterated its previous stand in favor of a continuance of assisted emigration of selected British settlers of a desirable type. A report of the national committee on immigration, under the chairmanship of George W. Allen, R.C., of Winnipeg, which has made an exhaustive survey of the subject, has been presented and accepted.

Expressing the firm conviction that China was desirous of obtaining foreign capital and that it held no sympathy for Bolshevism, Team Chl. one of the Chinese delegates to the recent International Postal Congress at Geneva, reached Quebec recently on S.S. Empress of Scotland, en route for Shanghai.

Back from a six weeks' inspection trip in the United States and western Canada, W. R. MacLennan, Vice-President, and George Stephen, Freight Traffic Manager, Canadian Pacific Railway, said that tourist traffic to Vancouver, Victoria and the Rockies showed very satisfactory increases this year. They emphasized that there was no feeling of pessimism in the Prairie Provinces.

It is expected that His Majesty King George, or His Royal Highness the Prince of Wales, will unveil the Vimy War Memorial in 1932, stated Brigadier-General T. H. Hughes, of Victoria, chief engineer of the Canadian Battlefields Memorial Commission in France and Belgium, interviewed on S.S. Montroyal on his arrival in Canada recently.

"We manufacture 15 million pieces of toffee per day in Great Britain, but not enough of it comes into Canada and we are seriously considering the opening of a Canadian factory to cater direct to the Canadian people," said Sir Harry MacKintosh, head of the famous British candy firm of the same name, interviewed on his arrival aboard S.S. Duchess of Bedford at Quebec recently.

One of the most beautiful and costly displays in the recent Exhibition at Toronto was the exquisite diamond replica of the latest Canadian Pacific Hotel, the Royal York, in Toronto. To build this unique miniature which was valued at over \$300,000, more than 15,000 Ellis faultless quality diamonds were utilized. These were mounted on a framework of satin wood covered with the finest wax. The miniature was drawn true to scale and measured 15 inches high by 12 inches broad.

The farm of James H. Walker, at Raymond, Alberta, of which 70 acres were sown to Kharkov wheat, yielded 2,800 bushels of 40 bushels to the acre, says the Lethbridge Herald. This particular crop was produced on a summer fallow field. The farm is diversified and rotated. Sugar beets do well on it and there is a flock of 2,000 sheep to help keep it in shape.

In a summary of the wheat situation the Manitoba Free Press points out that wheat is grading so high this year as to offset to a considerable degree the shortage in the crop. "Western Canadian wheat," it says, "has never graded so high in many years. The protein content of samples so far checked grade the highest that the West has known since the practice of testing for protein was inaugurated."

ROLLER BEARING BUSINESS GOES FLAT IN FACE OF WORLD SERIES

They Take Their Baseball Seriously
in Philadelphia

Philadelphia, Ohio—The City of Brotherly Love, which hasn't seen a World Series game for 15 years, has decided that baseball is the most important business in hand and has let everything else wait.

The man who comes into your office and tries to talk business while the megaphones on the corner are shouting who's on base or who's at the bat, is just as welcome as a bumblebee in a crowded sedan. Philadelphia has decided that the most philosophical way to handle the situation is to talk baseball while baseball is being talked.

Elevator operators are having a tough time of it. The best they can do is run out for a moment and inquire "How's she stand now?" Then run back to their cages before the starter is aware what's happening. The public realizing the hard lot of the elevator boys has formed what might be called the society for ending the suspense of elevator operators and gives them the news of the happenings at Shibe Park as hot off the griddle as possible.

The class of wage-earner who is sometimes referred to as a "captain of industry," and who in normal times preserves a dignified bearing and conservative air, has become democratized and, like the average man-on-the-street, wants to know "who's at bat now for the A's and what's the score."

A lot of the "captains of industry" have gone to the game and are pro-

WANTED

Rooming and boarding accommodation during Winter months for Agricultural School Students. Please phone or write to the School of Agriculture, stating nature of accommodation, class of students desired, and rates.

NOTICE

A pair of spectacles were left in the Canadian Bank of Commerce recently and they may be obtained from the Town Office by identifying name and paying for this ad. 1c25c.

tably slapping people on the back they have never seen before; but a lot of others who couldn't get there are standing under the megaphones, which are not more than two blocks apart in the downtown section of the city, and discussing the players as if they were bosom friends.

The writer of this chronicle went into the office of a firm which sells roller bearings for railroad trains. The office was a large one, but it had a kind of hollow sound. There was a girl at the switchboard.

"Say, mister," she said, "what's the score?"

"What's what score?" countered this writer. "I'd like to find out about buying some roller bearings."

"The man that sells roller bearings is out. Say, didn't you notice what the score was when you came in?"

There was an awkward silence.

"Oh!" breathed the girl, "of all the people in Philadelphia who might have come into this office just at this exciting time, somebody like you has to come in and not know the score."

"I'm sorry, but I don't know anything about baseball, and I came to see about roller bearings."

"The very idea," she sniffed, "roller bearings at a time like this."

That's the way it is. There's just about as much profit in the roller-bearing business here in Philadelphia at this writing as there'd be running a peanut stand in a police station.—Christian Science Monitor.

The Dear Boy

"Did the children behave when you bathed them?" asked the mistress of the new French nurse.

"All but ze biggest boy—and, mirab leu!—how he fight and kick an nearly tear ze face off me before I could get him in."

"Which biggest boy—we've only one boy, and he's only two year's old?"

"Eet is no him at all, I mean. 'Tis a boy who wears glasses an, has ze curly hair."

"Boy! Boy! That's not a boy! That's my husband!"—The Ink Spot.
